

ANNUAL RUNOFF IN 1000 ACRE-FEET

Annual totals by water year (Oct 1 - Sep 30). Most recent water year data may be provisional. Years with incomplete gauge data have been omitted.

Map of Colorado Showing Water Divisions

- USGS Surface Runoff Gauge
- Division Water Court
- Water Division

The Natural Resource Conservation Service water supply outlook, as of May 1, 2022, contains the following estimates of runoff for the May through July 2022 period at the following gauges (Note: Not all gauges shown to the left are forecasted, in which case a representative gauge from the outlook report was chosen):

Div.	River	May - July Forecasted Runoff (1000 AF)	Percent of 30 year Average
1	So. Platte River at South Platte	84	68%
2	Arkansas River above Pueblo	230	79%
3	Rio Grande River at Thirty Mile Bridge	69	68%
4	Gunnison River near Grand Junction	745	70%
5	Colorado River near Dotsero	950	79%
6	Yampa River near Maybell	675	94%
7	Animas River at Durango	235	71%
